
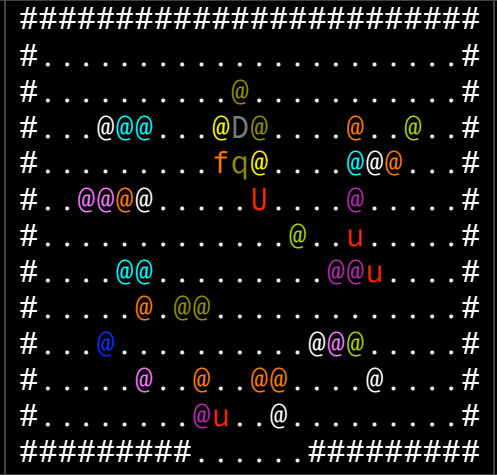
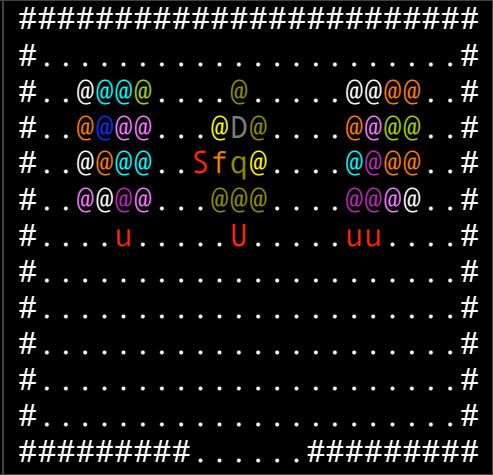
•This is Onyxia, matriarch of the Black Dragonflight



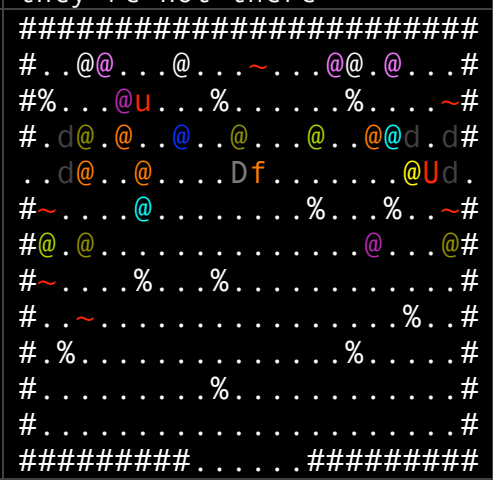
•Don't worry, she's old news by now. Not nearly as bad as she looks



•Phase 1 of killing her requires everyone but the tank to behave as though they're not there

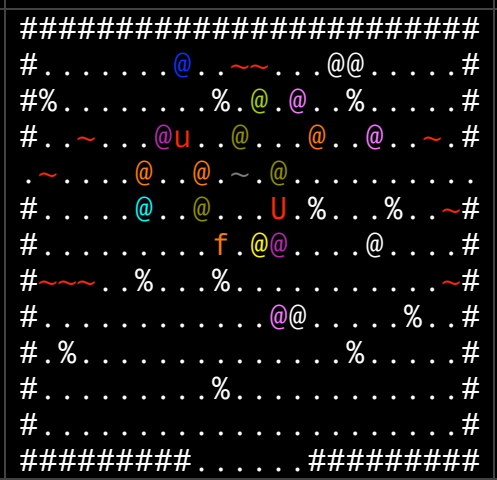
•Phase 2 involves shooting her as much as possible while also getting swarmed under by whelps

•Phase 2 can be rather chaotic

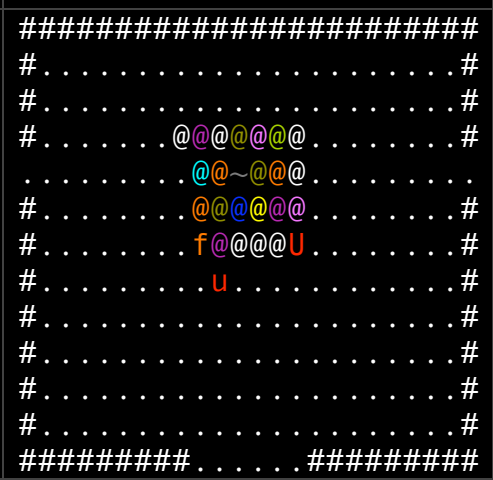


•Phase 3 is like phase 1, only with extra lava, earthquakes and death

•If you can manage to keep your people alive through the carnage, grats, you've earned your 50 dkp



•Once she stops twitching, your reward will soon be in your grasp: her head!



•Sorry, she only has one head. Consolation prize for those who are not the guild crafters: 2 gold.
